

CERAMIC

SIT-IN / SEMI RECESSED / INSET

essenza & onesto

The Essenza and Onesto offer modern solutions and timeless beauty – the perfect complement to a contemporary or traditional setting. The Essenza (sit-in, semi-recessed) provides a spacious main bowl with useful half bowl, whilst the Onesto (inset) provides a half bowl with large, useful run-off drainer.

Features – Essenza

- » Manufactured from luxury ceramic fireclay
- » Spacious main bowl suitable for washing large non-dishwasher items
- » The half bowl is situated at the back of the sink to exploit maximum area for the main bowl.

Features – Onesto

- » 1.5 Bowl inset sink with a unique overflow, and run off drainer
- » Manufactured from luxury ceramic fireclay
- » Left or right handed drainer
- » Expansive main bowl makes it suitable for washing large items.
- » Minimum base unit: 600mm

jersey & equinox

The Jersey ceramic sink features spacious bowls combined with an elegant wide expanse drainer area. This stunning oversized fireclay sink is a statement of function and design emanating quality and style.

The Equinox ceramic sinks are hand finished to give excellent quality, depth and texture. Available in both 1.0 and 1.5 bowl variants the Equinox is undoubtedly the most contemporary functional inset ceramic available.

Features – Jersey

- » Traditionally styled
- » Available in 1.5 bowl only
- » Hand finished in high gloss ceramic
- » Pop-up waste as standard.

Features – Equinox

- » Flexible sink at home in either a modern or traditional kitchen setting
- » Hand finished in high gloss ceramic
- » Generous bowl make this a practical sink
- » Sleek contours and a linear drainer add to the overall clean look of the sink.

SIT-IN / INSET

edinburgh & aquitaine

The bow fronted Edinburgh sink offers an elegant spacious fireclay sink that gives a fresh alternative to timeless classic Belfast.

The Aquitaine combines curvaceous contours with a solid ceramic finish. Available in 1.0 and 1.5 bowl variants.

Features – Edinburgh

- » Spacious sink with generous bowl size
- » At home in either a modern or traditional setting
- » Finished in a stunning high gloss finish

Features – Aquitaine

- » Both the 1.0 and 1.5 bowl are reversible
- » Solid, curvaceous contours and a defined linear drainer pattern combine to create a sink equally at home in traditional and modern kitchens alike
- » Generous bowl and drainer sizes make this sink a practical solution
- » Finished in a stunning high gloss finish
- » Optional accessories available.

CERAMIC
SIT-IN

belfast & butler drainer

The Belfast sink has become a popular household addition in recent years. Our luxury straight-sided thick walled version is an exact replica of the original Victorian design. The sink has a deep bowl, ideal for larger items, and comes complete with chrome waste and traditional integrated weir overflow.

The Butler Drainer is a superb additional item to the Belfast sink – sitting on top of your worktop it allows you to use it for draining or as an additional preparation area.

Features

- » The weir overflow adds to the classic look of the sink
- » At home in a traditional kitchen
- » Individually hand crafted
- » Fits on a standard Belfast sink base cabinet
- » Finished in ceramic fireclay
- » The Butler Drainer is a practical addition to any Butler sink in the range.

THE BUTLER SINKS RANGE FROM ASTRACAST ARE TIMELESS CLASSICS, ELEGANT AND SPACIOUS TO SUIT ANY STYLE KITCHEN

CERAMIC
SIT-IN

canterbury & sudbury

Manufactured from Premium Fireclay High Gloss Ceramic the Canterbury is a modern alternative to the traditional styled Belfast sink.

The Sudbury has very clean, angular contours giving a contemporary look which is equally at home in both modern and traditional environments. Available in both single and a large double bowl version for ultimate flexibility.

Both models are capable of handling larger items such as grill pans and woks.

Features – Canterbury

- » Modern design based on the traditional Butler style sink
- » Straight lines give the sink a distinctly contemporary feel
- » Can be installed with all worktop types (including laminate)
- » Practical half bowl at the rear of the sink.

Features – Sudbury

- » Design at home in either a traditional or contemporary setting
- » Large bowl sizes on both sinks make this a practical option
- » Clean angular contours.

UNDERMOUNT / INSET – FEATURE SINK

onyx

The Onyx Inset/Undermount sinks are manufactured from Premium Brushed Steel and the Inset version can be fitted into any worktop material including laminate – giving the look and feel of a designer sink without the added expense of polishing granite or rounding edges.

Features

- » Can be used with granite and solid surface worktops (undermounted) or with laminate worktops (inset)
- » Compact, easy clean with radiused corners
- » Ideal for compact kitchens where space is limited or for island unit application
- » Mix and match between the various bowl configurations to customise the work centre
- » Achieve a streamlined undermount look without the need for solid surface worktops (inset)
- » Drainer benefits from slimline waste, which allows fitting over appliances such as dishwashers.

*Onyx Drainer Comes with slim drainer waste to enable you to position the drainer in the worktop above appliances such as dishwashers.

Taps

FROM THE RUSTIC FARMHOUSE TO THE
ULTRA MODERN PENTHOUSE APARTMENT
THERE IS A TAP TO COMPLEMENT
AND FINISH THE SETTING.

WITH A MYRIAD OF COLOURS, FINISHES AND
ADDITIONAL FUNCTIONS, MAKE THIS
AN UNPARALLELED FAMILY FROM WHICH
TO SELECT YOUR PERFECT TAP

taps to complement your kitchen...

The perfect finishing touch with one of the most important accessories in any kitchen!

Astracast's stylish taps are in-line with most kitchen manufacturers gleaming finishes and will complement all kitchen styles – whether city slick, rural chic or country farmhouse, there will be a style of tap available to scintillate all tastes.

Our wide range of taps are available in either:-

- Stainless Steel
- Professional
- Contemporary
- Classic
- Traditional
- and not forgetting...
- Springflow® our fantastic water filtration system.

Colour Coding

Throughout this tap section each tap has its own individual colour-coded, key features. The colours aim to make it easier to pick out the features you want when making your choice of tap.

Tap features

- High Pressure
- Med Pressure
- Low Pressure
- Compression
- Single Flow
- Dual Flow
- Quarter Turn
- Pull-Out
- Directional Spray
- Swivel Body

Design and Innovation

From designer waterfall spouts to ceramic style traditional handles, every detail has been considered on each tap so that no matter what your kitchen style is, there is a tap to match. Our collection collates the taps by style and function which can help guide your choice. Use the colour-coded key features to help identify the features and benefits that would most complement your kitchen.

Understanding tap dimensions

The dimensions of the taps are located in the following technical specifications section, the measurements are in order of tap height, spout reach and spout height.

Water Pressure

When choosing a tap you need to consider the water pressure available in your home. (See operating pressures for each tap in the technical specifications at the back of the brochure). Cold water will be at mains pressure so is not usually a problem*, the pressure at which your hot water comes out the tap is vital and you must note those designs which require a high pressure to perform well.

If you have an un-pressurised system then you will need to calculate the head of hot water available to you before looking at our recommended minimum operating pressure and making your selection; – taking into consideration the route, any bends or diversions in the pipe work could reduce the pressure. If needed, contact your plumber for professional advice.

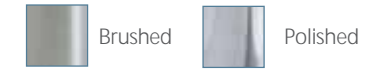

Water pressure is measured in the unit bar (also termed 'head') which is the distance from a presumed water tank to the tap in height +10 (1 bar = 10 metres head of water).

Pumps to boost water pressure can be purchased from all good DIY and plumbing retailers, should your tap of choice require a greater pressure than your system offers.

*If you live on a higher floor or your water supply comes from a private supply then check the minimum hot/cold water supply suitability.

* We offer a lifetime finish guarantee on our stainless steel taps.

TAP SUPPORT BRACKET

Order code: TP0431
(Standard)

Order code: TP0518
(Pull-Out Taps)

On occasion, depending on the type of sink and weight of the tap being fitted, a tap may require additional support. This product is designed to reduce the amount of sway of the tap when it is being used and to minimise any potential long term damage to sinks, taps or pipe work. This product is particularly applicable to the following conditions:

- The tap is fitted to a budget inset stainless steel sink.
- The sink is a single bowl model, or has a large drainer section.
- Taps using flexible connectors rather than rigid copper tail pipes.

Finesse

Features	Dimensions:
Med Pressure 0.3 Dual Flow	168 x 231 x 136mm

Low Pressure 0.1 Dual Flow Quarter Turn	382 x 193 x 252mm
Available in:	
Chrome – TP0415 English Gold – TP0483	

CHOOSE TASTE

Making and keeping water safe means water companies have to use chemicals like chlorine that can significantly affect taste and odour. In addition natural sediment and other non-harmful contaminants can end up making our water taste and look anything but fresh.

Springflow®, however, transforms this into natural fresh tasting and odourless water that is a sheer pleasure to drink!

Springflow® filter taps combat odours and contaminants in your water supply to improve the appearance and taste of tap water, dramatically reducing chlorine by up to 99%.

Your Springflow Filter will reduce:

- Chlorine
- Sediment
- Pesticides
- Dirt
- Solvents
- Rust

To give you fresh, crystal clear natural tasting filtered water in your own home.

CHOOSE HEALTH

Water is an essential component of life. We can't live without it.

In the UK we take it for granted that we have safe drinking water on tap. Springflow® goes even further; combating herbicides, pesticides, insecticides and other organic chemicals – making it not just taste better but healthier too!

CHOOSE SPRINGFLOW®

You can't choose the quality or source of your tap water, but with a Springflow® filter tap you can transform your normal mains supply into fresh, natural tasting filtered water – at the touch of a handle.

Springflow® filter taps give additional protection against chemicals that may be present in the mains supply, reducing chlorine by up to 99% and filtering out sediment, dirt and rust whilst leaving the minerals essential to good health.

Springflow® pure filtered water

At the turn of a handle Springflow® taps dispense an endless supply of refreshing crystal clear water, it couldn't be easier!

CHOOSE SIMPLICITY

Our patented valve system means there is no need for additional handles or fuss – just push the cold handles back to dispense fresh filtered water.

Our filter, hidden away under the sink can be mounted in any position, horizontal or vertical – to best fit the space you have to offer. When it comes to changing the filter you don't need a new unit just open up the discreet casing and pop in a new cartridge. No mess, no hassle, just great tasting water.

- Springflow® enhances the taste of soft drinks, tea, coffee and even food, when used for cooking.
- Springflow® reduces the build-up of lime scale extending the life of appliances including kettles.
- Springflow® treats up to 2,500 litres of water, around six months use, with just one cartridge.

CHOOSE ECONOMY

A typical bottle of water would cost up to 30 x more than Springflow® filtered water, and with Springflow® there is no plastic waste.

CHOOSE DESIGN...

Our current range features a tap for every kitchen.

Springflow®
