

stainless steel sinks

Commercial quality sinks for the home. Many say there is no better material for a sink than stainless steel. It is tough, resilient and highly practical – which is why it is the choice of professional cooks.

inset sinks

For clean, contemporary and minimalist surroundings, inset stainless steel sinks are incredibly popular and blend in perfectly with modern furniture, appliances and décor. Durable and easy to care for, their stylish good looks will not fade.

Inset sinks feature edges that sit on top of the worktop, allowing them to be fitted into any surface type. Our range is conveniently grouped into families, making it easy for you to find the right style and bowl combination to suit your kitchen. Built-in drainers are a common design element of these sinks, each one featuring a pattern that brings a unique style to the overall look.

Many of our sinks offer a choice of left or right drainers, some are even reversible, allowing you to fit them with the drainer on your preferred side. The most conventional design is a single bowl with drainer, however one and a half or double bowls with drainers are also very popular.

Accessorise your sink

Looking for the ultimate sink accessory? Then check out our exclusive glass chopping board available with the Lyon sink range. Featuring a funky printed design on frosted glass, it's a must-have purchase!

zero individual and multiple bowls

Inspired by the latest designer kitchen trends, the Zero range of bowls are beautifully crafted. With crisp edges and clean lines, these sinks are the ultimate in contemporary minimalist design.

Zero sinks are a designer's dream as they can be inset or undermounted, enabling you to integrate them into any worktop. These striking geometric bowls come in an array of sizes, allowing countless creative combinations. Multiple bowls and a sleek shallow drainer are also available – so mix and match until your heart's content! Made from stainless steel, these sinks won't rust, stain, fade or crack.

Cutting edge

Nothing says modern more than clean lines and minimalist styling – and our designer Zero sinks offer just that. Featuring a unique angular bowl design with a 'zero' degree radius and tapered base, they are the perfect fashion item for the modern kitchen.

Zero 45 drainer option

For something a little left of centre, team a Zero bowl with a matching drainer, this hot new look will add a unique touch to your kitchen. If you're really out to impress why not try a combination of two Zero sinks and a matching drainer.

mode individual and multiple bowls

Chic and sophisticated, our Mode collection takes modern sink design to the next level. Versatile, adaptable and above all, beautiful – these stainless steel bowls are unlike any other.

Mode's distinctive look comes from a combination of ultra modern straight edges and a slightly curved radius of only 25mm – the result is a contemporary sink with a touch of class. Even more appealing is the abundance of sizes available within the range, including single and double bowl options and a matching drainer.

With so much to choose from, you'll have loads of fun selecting a configuration tailored specifically to your kitchen. For instance; the symmetry of two medium bowls creates a balanced aesthetic, the combination of a small and a large bowl adds the element of contrast and a large bowl together with a shallow drainer looks simply elegant.

Truly versatile

Fitted as either inset or undermounted, Mode sinks give you the flexibility to use the worktop and tap of your choice. Create a professional look with an impressive spray tap or go minimal with an elegant modern tap. Show off your sink with a chunky wooden worktop or keep it cool with a sleek granite surface.

Mode 45 drainer option

Providing practicality and style, the Mode drainer is an elegant accompaniment to our range of Mode individual bowls. Featuring a contemporary shallow base, it offers the full practicality of a drainer whilst maintaining a sleek minimalist design.

form individual and multiple bowls

Combining the many benefits of stainless steel with traditional styling, the Form collection is a popular classic.

The majority of the Form sinks are undermounted, making them suitable for use with wooden, granite or solid surface worktops. However, the range also includes several inset models which can be used with laminate surfaces.

Our charming, individual bowls come in a selection of shapes and sizes. There are also multiple bowl options available, so you can customise a sink combination to meet your specific needs.

Crafted from stainless steel, Form sinks benefit from the material's inherent durability, whilst giving a professional look to your kitchen. As you would expect from Caple, the range is made to the highest standards, using quality materials for maximum strength and longevity. Practical, stylish and functional, our Form collection won't disappoint.

Versatile all-rounder

If you like the clean look of individual bowls but need a drainer, our round inset drainer option could be just what you're looking for. To create a modern twist on the traditional country cottage style, pair with a single round bowl and place in a solid wood worktop.
